

Your Best Decisions Come from the Best Input

Using a facilitator to run your workshops and meetings enables you to concentrate on getting the best out of your business

Every CEO, MD, CIO and FD needs some support from time to time to meet company goals. With all the pressures of the workplace, leaders seldom have the time to look at how well they are doing, or how to make things better. CJB Corporate Coaching combines effective business consulting with innovative coaching approaches to help you and your company be more productive and successful.

Our objective is very simple : as an impartial outsider to your organisation, to provide insight into how it is working - and then challenge the status quo and help you to focus on what is important.

As business process specialists we help you to :

- Learn lessons from programmes and projects
- Define new products and services
- Build consensus around business change and new ideas
- Organise and motivate teams
- Define requirements around and help kick-start new projects and programmes
- Define and mitigate key business and technology risks
- Gain and maintain buy-in to new strategies and directions
- Resolve difficult issues and complex business problems

Above all, we help you to become more successful and productive by engaging your people through practical, effective business facilitation.

With over 20 year's experience in business, technology and general management, supported by relevant business qualifications, our approach to your organisation will be tailored to ensure it is unbiased, objective and relevant to your needs

*"Chris quickly understood how we work and worked closely with the entire management team.
The planning process this year has been the best we've done. For the first time we have a clearly understood strategy"*
Harry Dicks
